

Phoomtanet Intayung

FULL STACK DEVELOPER

I am a Full Stack Developer with nearly 2 years of experience in developing web and mobile applications using Next.js, Node.js, and React Native. I have strong skills in requirement analysis and system design, including databases, APIs, and UI, with a focus on simplicity, usability, and performance. I am eager to learn new technologies and continuously improve myself to deliver solutions that effectively meet business needs.

Skills

Languages

Java JavaScript TypeScript SQL

Front-end

Next.js React React Native Flutter

Back-end

Node.js Express.js

Database

PostgreSQL SQL Server MySQL

Tools

GitHub GitLab Postman Docker

Education

B.Eng. Computer Engineering
Rajamangala University of Technology Isan
2021 – 2024 **GPA 3.43**

High Vocational Certificate — Industrial Electronics
Surin Technical College
2018 – 2020 **GPA 3.15**

Work Experience

- Full Stack Developer** Nov 2024 – Mar 2026 · 1 year 5 months
Intelligence System Corporation Co., LTD
 - Developed web applications using Next.js and Node.js
 - Built mobile applications with React Native
 - Designed databases, wrote SQL queries, and integrated APIs
 - Collaborated on planning, analysis, and system development with the team
- Full Stack Developer (Internship)** Apr – Oct 2024 · 6 months
Intelligence System Corporation Co., LTD
 - Developed web applications using Next.js and Node.js
 - Built mobile applications with React Native
 - Designed databases and integrated REST APIs
- Full Stack Developer** 3 months
Freelance
 - Developed mobile applications using Flutter with Node.js backend services
 - Designed database and integrated RESTful APIs

Projects

- Employee Welfare Management System** 1 month
 - Developed user role-based access control system (Admin, HR, Accounting)
 - Implemented email notification system
 - Integrated organizational data to work systematically
 - Enabled accounting department to review transactions and generate reports faster
- Repair Management System** 4 months
 - Designed job status update system (e.g., receive job, send for repair, price evaluation, repair complete, return to customer)
 - Reduced manual work, prevented item loss, and improved data accuracy
 - Displayed job lists and overview through dashboards for easy status tracking
- Student Assessment System** 8 months
 - Connected data with existing education systems via APIs (students, instructors, courses, registrations, grades)
 - Developed customizable assessment forms according to requirements
 - Students can access their own data such as grades, registered courses, and assessment status
- Child Care Center Management System** 5 months
 - Built childcare management system (attendance tracking, health monitoring, childcare expenses)
 - Designed dashboards and reports for operational monitoring
 - Enabled caregivers and parents to accurately track child development, helping promote targeted child development
- E-Commerce System (Freelance)** 3 months
 - Developed product management system from listing to buyer delivery
 - Implemented real-time product auction and price negotiation using WebSocket
 - Developed order tracking, inventory management, and product status system
