Skills

Languages

- Java
- JavaScript
- TypeScript
- SQL

Front-end

- Next.js
- React
- React Native
- Flutter

Back-end

- Node.js
- Express.js

Database

- PostgreSQL
- SQL Server
- MySQL

Tools

- GitHub
- GitLab
- Postman
- Docker

Education

- B.Eng. Computer Engineering**
Rajamangala University of Technology
Isan
2021 – 2024
GPA 3.43
- High Vocational Certificate — Industrial Electronics**
Surin Technical College
2018 – 2020
GPA 3.15

Work Experience

- Full Stack Developer** Nov 2024 – Mar 2026 · 1 year 5 months
Intelligence System Corporation Co., LTD
 - Developed web applications using Next.js and Node.js
 - Built mobile applications with React Native
 - Designed databases, wrote SQL queries, and integrated APIs
 - Collaborated on planning, analysis, and system development with the team
- Full Stack Developer (Internship)** Apr – Oct 2024 · 6 months
Intelligence System Corporation Co., LTD
 - Developed web applications using Next.js and Node.js
 - Built mobile applications with React Native
 - Designed databases and integrated REST APIs
- Full Stack Developer** 3 months
Freelance
 - Developed mobile applications using Flutter with Node.js backend services
 - Designed database and integrated RESTful APIs

Projects

- Employee Welfare Management System** 1 month
 - Developed an employee welfare system (Admin, HR, Accounting) with RBAC and RESTful APIs
 - Designed scalable database schema for efficient data management
 - Reduced manual processing time by ~40% through workflow automation
 - Improved data accuracy and minimized errors with centralized system
- Repair Management System** 4 months
 - Built a repair management platform (Mobile Webview + Back-office) for tracking jobs
 - Designed dashboards and reports for real-time monitoring
 - Reduced repair tracking time by ~30% with centralized workflow
 - Improved operational visibility for faster decision-making
- Student Assessment System** 6 months
 - Developed an evaluation system with analytics dashboards and reporting
 - Supported multiple assessment types (self, peer, teacher) with tracking features
 - Integrated centralized student data from educational databases
 - Reduced evaluation processing time by ~35% and enabled data-driven insights
- Child Care Center Management System** 5 months
 - Built a childcare management system (attendance, health tracking, overtime calculation)
 - Designed dashboards and reports for operational monitoring
 - Improved operational efficiency by ~30% by reducing manual processes
 - Enhanced caregiver workflow with streamlined daily operations
- E-Commerce System (Freelance)** 3 months
 - Developed a mobile application with product, delivery, and order management
 - Implemented inventory tracking and order processing system
 - Built review and rating features to enhance user experience
 - Increased order management efficiency by ~25% and improved engagement
